

Engineered for Dredging

# TSHD Components Package

ECTMarine is specialized in design and supply of dredging equipment for cutter suction dredging vessels, as well as trailer suction hopper dredgers.

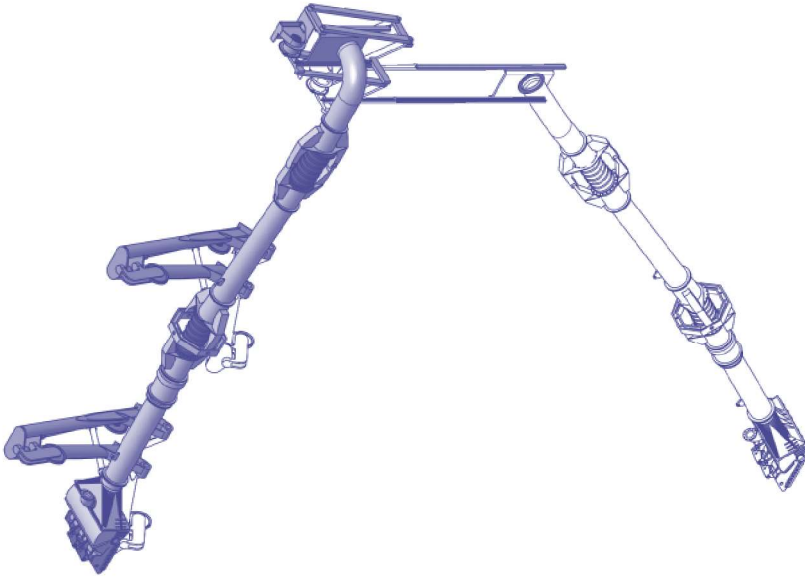

ECTMarine is specialized in integrating dredging equipment in the dredging vessel design. Our engineering is managed and executed by professionals that have extensive knowledge and experience in the dredge building industry.

ECTMarine TSHD components are recognized by its modular design, low maintenance, heavy duty use and reliability.

The dredge equipment can be customized to fit a new build TSHD as well as a conversion of an existing vessel into a TSHD.

The dredge equipment that that can be supplied for TSHD's is, but is not limited to:

TSHD Components
Side suction pipe system
Side suction pipe hoisting equipment
Bottom doors
Overflow
Bow coupling installation
Dredge pump system
Jet water system
Degassing system
Hydraulic system
Electric system and automation
Dredge control system
Dredge monitoring system

TSHD COMPONENTS  
SIDE SUCTION PIPE
